

SALONI KUMARI

Software Engineer | Full-Stack Development | Java · Python · MERN · AI/ML

+91 9341706734 | saloni26lnct@gmail.com | [linkedin.com/in/saloni-singh-8a1808253](https://www.linkedin.com/in/saloni-singh-8a1808253) | github.com/Saloni468kumari

PROFESSIONAL SUMMARY

Final-year B.Tech (AI/ML) engineer with 300+ DSA problems solved, end-to-end MERN and AI-powered applications shipped to production, and demonstrated ability to deliver quantifiable outcomes — 40% faster image delivery, sub-80ms API response times, and 90% automation of manual workflows. Comfortable owning features from requirements to cloud deployment in fast-paced, multi-tech service environments. Seeking a software engineering role where clean code, RESTful API design, and continuous delivery create direct client value.

TECHNICAL SKILLS

Languages	Java (OOP), Python, JavaScript (ES6+), SQL
Backend & APIs	Node.js, Express.js, FastAPI, RESTful API Design, JWT Authentication, Middleware
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Databases	MongoDB, MySQL, Vector Databases
AI / ML	LangChain, LangGraph, RAG Pipelines, Hugging Face, Google Gemini API
Cloud & Tools	Vercel, Strapi Cloud, ImageKit CDN, Git, GitHub, Postman, Jupyter Notebook
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROJECT EXPERIENCE

Full-Stack Car Rental Booking Platform

MERN Stack · JWT · ImageKit CDN · MongoDB · Express.js · React.js

- Architected and shipped 5 RESTful API modules (auth, listings, bookings, users, images) with all CRUD operations benchmarked under 80 ms locally — equivalent throughput to production-grade micro-service SLAs.
- Eliminated 100% of unauthorised endpoint access by engineering JWT-based role-level access control across both React route guards and Express middleware layers.
- Cut image load times by 40% by migrating from direct MongoDB binary storage to ImageKit CDN with auto-optimised srcsets, directly improving perceived performance for end users.
- Reduced integration debugging time by ~50% by building modular Express.js route handlers with centralised error-boundary middleware — a pattern reusable across any future service module.

AI-Powered Fitness Tracker (Production)

React.js · Strapi CMS · Google Gemini Vision API · Vercel · Strapi Cloud

- Delivered a fully production-deployed full-stack application in under 6 weeks as a solo developer — frontend on Vercel, CMS/backend on Strapi Cloud, with live data sync and role-based access.
- Automated calorie logging for 90% of meal entries by integrating Google Gemini Vision API into a custom Strapi content type, eliminating manual data entry and reducing user effort to a single photo upload.
- Designed a scalable content schema in Strapi that supports multi-role access (admin, user) without code changes — a pattern directly applicable to service-company client portals.

EDUCATION

B.Tech — Computer Science & Engineering (AI & Machine Learning) *Expected May 2026*

Lakshmi Narain College of Technology, Bhopal | CGPA: 7.98 / 10

CBSE Class XII: 76.8% | CBSE Class X: 85%

CERTIFICATIONS & ACHIEVEMENTS

- ▶ NPTEL Certification — Database Management Systems (IIT-level course, nationally proctored)
- ▶ Web Development Certification — Udemy Full-Stack Bootcamp + Google GDSC Web Dev Bootcamp
- ▶ Edge AI Workshop — INDEYES (hands-on embedded AI application development)
- ▶ 300+ problems solved on LeetCode and GeeksforGeeks
